Teatro Histórico LA CHUPILCA

Teatro Histórico La Chupilca was born in 2008 with the mission of spreading Chilean popular culture through theater and music. The company accomplish this through a playful and colloquial language that takes elements of the jugglery and the object theater to connect with a family audience.

Its creations have received great praise from the public and critics, being summoned to the most important festivals and stages of the country. The company has in its heart the development of projects for the creation of audiences in peripheral areas and rural sectors, that have led them to travel Chile from north to south; from the Atacama Desert to Patagonia.
